**PROJECT 260093CM**

**RFQ For Construction Management Firm Selection  
Oklahoma Children's Hospital – Pediatric Heart Center Facility**

**RFI-02: Clarification on ARPA**

1. Clarification on ARPA:

The RFQ indicates a preference for candidates with prior experience in projects funded by ARPA or other federal sources. Please confirm whether ARPA or any other federal funds will be utilized.

If yes, could you please provide the following information:

- (i) The federal agency responsible for administering the grant funds,
- (ii) The federal requirements that will apply and be passed down to the construction manager (CM).

Response:

The project funding sources do not currently involve federal funds and as such certain federal reporting such as payroll certifications and Davis-Bacon will not be required at this time. However, there is a possibility that funding sources for this project may change in the future to include certain federal requirements. If that were to happen, UHT would provide ample notification to any contractors impacted. Furthermore, while these reporting elements are not currently required, UHT believes the principles of fair wages and fair labor negotiations are ones that each contractor should adhere to regardless of reporting requirements. Finally, this UHT project is subject to certain state requirements. Any legislation that impacts the project requirements such as Buy America requirements or other specialized reporting will be communicated to the contractors if and when those requirements become applicable."
